## LEGAL CAVEAT

The Advisory Board Company has made efforts to verify the accuracy of the information it provides to members. This report relies on data obtained from many sources, however, and The Advisory Board Company cannot guarantee the accuracy of the information provided or any analysis based thereon. In addition, The Advisory Board Company is not in the business of giving legal, medical, accounting, or other professional advice, and its reports should not be construed as professional advice. In particular, members should not rely on any legal commentary in this report as a basis for action, or assume that any tactics described herein would be permitted by applicable law or appropriate for a given member's situation. Members are advised to consult with appropriate professionals concerning legal, medical, tax, or accounting issues, before implementing any of these tactics. Neither The Advisory Board Company nor its officers, directors, trustees, employees and agents shall be liable for any claims, liabilities, or expenses relating to (a) any errors or omissions in this report, whether caused by The Advisory Board Company or any of its employees or agents, or sources or other third parties, (b) any recommendation or graded ranking by The Advisory Board Company, or (c) failure of member and its employees and agents to abide by the terms set forth herein.

The Advisory Board is a registered trademark of The Advisory Board Company in the United States and other countries. Members are not permitted to use this trademark, or any other Advisory Board trademark, product name, service name, trade name, and logo, without the prior written consent of The Advisory Board Company. All other trademarks, product names, service names, trade names, and logos used within these pages are the property of their respective holders. Use of other company trademarks, product names, service names, trade names and logos or images of the same does not necessarily constitute (a) an endorsement by such company of The Advisory Board Company and its products and services, or (b) an endorsement of the company or its products or services by The Advisory Board Company. The Advisory Board Company is not affiliated with any such company.

## IMPORTANT: Please read the following.

The Advisory Board Company has prepared this report for the exclusive use of its members. Each member acknowledges and agrees that this report and the information contained herein (collectively, the "Report") are confidential and proprietary to The Advisory Board Company. By accepting delivery of this Report, each member agrees to abide by the terms as stated herein, including the following:

1. The Advisory Board Company owns all right, title and interest in and to this Report. Except as stated herein, no right, license, permission or interest of any kind in this Report is intended to be given, transferred to or acquired by a member. Each member is authorized to use this Report only to the extent expressly authorized herein.
2. Each member shall not sell, license, or republish this Report. Each member shall not disseminate or permit the use of, and shall take reasonable precautions to prevent such dissemination or use of, this Report by (a) any of its employees and agents (except as stated below), or (b) any third party.
3. Each member may make this Report available solely to those of its employees and agents who (a) are registered for the workshop or membership program of which this Report is a part, (b) require access to this Report in order to learn from the information described herein, and (c) agree not to disclose this Report to other employees or agents or any third party. Each member shall use, and shall ensure that its employees and agents use, this Report for its internal use only. Each member may make a limited number of copies, solely as adequate for use by its employees and agents in accordance with the terms herein.
4. Each member shall not remove from this Report any confidential markings, copyright notices, and other similar indicia herein.
5. Each member is responsible for any breach of its obligations as stated herein by any of its employees or agents.
6. If a member is unwilling to abide by any of the foregoing obligations, then such member shall promptly return this Report and all copies thereof to The Advisory Board Company.

# 1) Executive Overview

---

## Key Observations

**Block scheduling improves semester-to-semester and year-to-year retention rates.** Contacts report increases in semester-to-semester and year-to-year retention rates of students in block scheduling compared to peers with traditional schedules. Switching to a block schedule model also reduces the number of extraneous courses students take before graduation, which reduces the student debt burden.

**Successful transitions to block schedules require high levels of faculty engagement.** Block schedules increase the amount of contact between faculty members and students. Increased class time forces faculty members to reassess their pedagogy and curricula. The frequent and lengthy class sessions of a block schedule also require faculty members to alter the pace of lectures, discussions, and assignments. Block scheduling pedagogy places a greater emphasis on complex case-study and group assignments, rather than assessments such as quizzes and tests.

**Student registration systems require manual intervention to create schedules.** Registrar staff manually create schedules for student cohorts. Student success office staff develop a 'centrally recommended schedule' to discuss potential conflicts and meet with each department head that includes a proposed time for a course session. Department heads confirm the ability of the department to provide a faculty member and classroom for the proposed block time. Contacts allow block schedule participants to register for classes before administrators open enrollment for the rest of the student body.

**Undeclared transfer students and students seeking to quickly complete general education courses benefit from block scheduling.** Undeclared transfer students need to complete all general education requirements before they transfer to a four year institution. Block schedules expedite the completion of general education courses. Likewise, students that have completed all associate or technical degree requirements but still need to complete general education courses benefit from block scheduling.

**Course scheduling software products expedite the scheduling process and minimize scheduling conflicts.** Products such as Astra Schedule, Campus Manager 5.0, and Schedule25 allow administrators to schedule all campus-wide courses and identify and consolidate under-enrolled sections. These tools allow administrators to analyze course registration trends and predict future demand.

## 2) Implementing Block Scheduling

### Block Schedule Construction

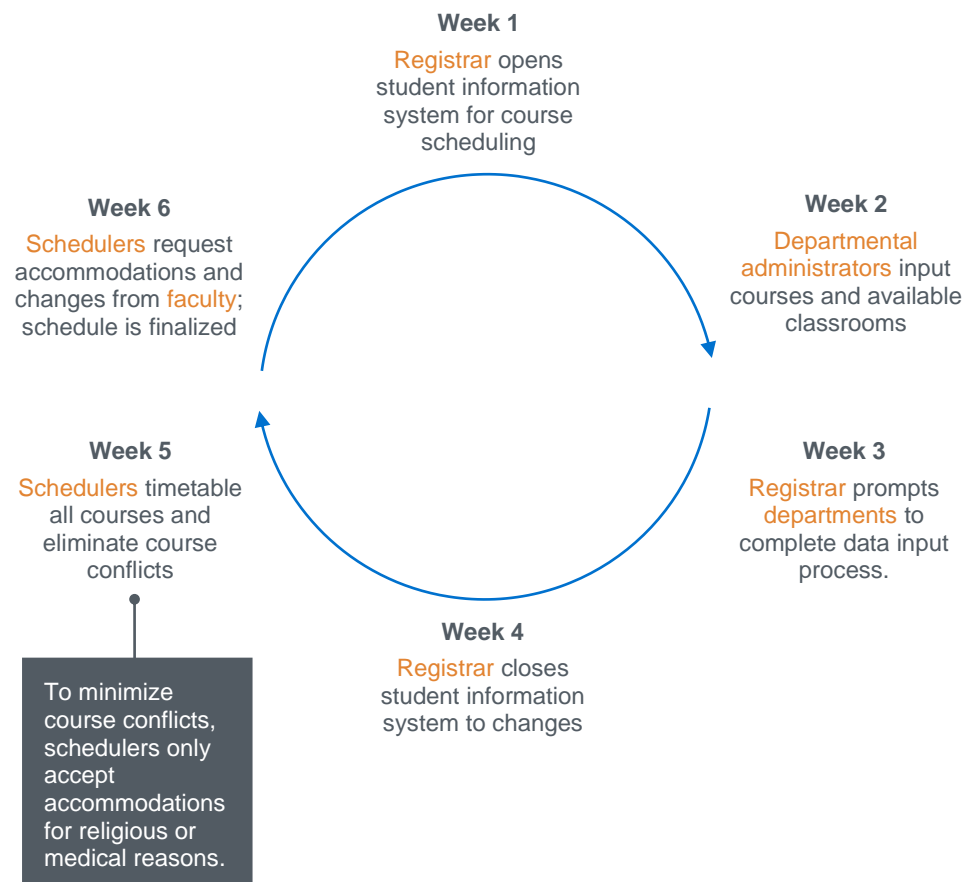

#### **Coordinate Block Schedules with Registrar Staff, Student Success Staff, and Department Heads**

Meet with registrar and student success staff to create a 'centrally recommended schedule' for block courses. Present the schedule to department heads to confirm that the time and location of the proposed block work for the faculty and facilities. Block scheduling requires more time and coordination than traditional schedules, and thus should take priority for registrar staff. Most institutions offer block courses early in the morning or in the evening to allow traditional courses in the early and late afternoon.

#### **Courses with Laboratory Components**

Administrators build additional time into courses that require a laboratory component. A traditional block course ranges between 75 to 150 minutes. Courses with lab components alternate between shorter block sessions (i.e., 75 minutes) and longer lab sessions (i.e., 150 minutes).

### Course Scheduling Process

**Supplement Student Information Systems Such as Banner with Additional Scheduling Technology**

Student information systems (e.g., Banner) require manual inputs to successfully create block schedules. Registrar staff complain that creating a single block schedule for one student requires 15 minutes of work on the back end of a student information system. Administrators supplement student information systems with additional technologies.

**Scheduling Technologies**

**Astra Schedule**

- Unifies entire campus schedules into one interactive graphic to prevent double-bookings

**Campus Manager**

- Provides dynamic user tracking services for real-time monitoring of schedule construction

**Schedule25**

- Optimizes the most efficient space allocations for campuses

**Development Courses**

**Require Students to Complete Prerequisite Courses before Enrolling in Block Schedules**

Administrators report difficulty creating block schedules for students with varied developmental needs (e.g., ESL students, literacy development, and long gaps between formal educational experiences). Students with developmental needs struggle to keep pace with block scheduled courses. Administrators mandate all students complete prerequisite courses before they enroll in a block course. This practice prevents students enrolled in developmental courses from enrolling in a block schedule.

*“All college-prepared students are the same, but all unprepared students are unprepared in different ways.”*

*-Forum Interview*

### 3) Student Populations Impacted by Block Scheduling

#### Advantages of Block Scheduling

#### *Improve Pedagogy Reform and Information Retention with Block Scheduling*

Administrators provide anecdotal evidence of increased student comprehension in block classes compared to traditionally scheduled classes.

#### Faculty Classification, Workload, and Benefits

##### Improved Teaching

Longer class blocks give faculty more time to complete lesson plans between class sessions. Faculty report an increase in creative lessons, better collaborative projects, and greater diversity of pedagogical practices to meet the needs of different learning styles.

##### Improved Learning

Block scheduling allows students to focus on fewer subjects. Each subject receives greater attention, detail, and depth. Block schedules prevent the fragmentation of instructional time since students do not frequently transition to a new class.

##### Faster Time-to-Completion

Block scheduling limits the number of course offerings available to students. As a result, students take fewer extraneous courses that fail to satisfy program or general education requirements.

##### Improved Retention

Contacts report an increase in semester-to-semester retention rates after the transition to a block schedule. However, most block schedule programs require students to opt-in, creating a self-selection bias.

## ***Transfer Students and Students Enrolled in STEM Programs Benefit More from Block Scheduling***

Many institutions use block scheduling exclusively for general education courses. This allows students to complete general education requirements quickly before they begin courses that count towards a major.

### **Benefits and Handicaps of Block Scheduling for Various Student Populations**

#### **Benefits**

**Programs:** Block schedules benefit STEM and technical degree students because the serialized nature of the courses. The limited class size and highly specific content of STEM courses also benefit from block scheduling.

**Students:** Students interested in transferring to four year institutions benefit from block scheduling. Students quickly complete general education requirements before they transfer to a four year institution to complete a program of study.

**Demographics:** Working adults and non-traditional students benefit from block scheduling. Working adults can more easily arrange work and childcare schedules around the reduced number of campus visits for class.

#### **Handicaps**

**Programs:** Liberal arts programs lack a serialized course order. Liberal arts faculty encourage students take varied courses as a means of self-discovery.

**Students:** Students that need additional academic support struggle with the in-depth and nuanced topic discussions.

**Demographics:** Recent high school graduates struggle to adjust to the dramatically longer course sessions. Block schedules also limit academic curiosity and exploration.

## 4) Block Scheduling Outcomes

---

### Metrics

#### ***Measure Block Schedule Impact on Student Success With Traditional Metrics***

Measure student success with traditional metrics to compare the success of block schedule student cohorts to traditional schedule student cohorts. Develop metrics to evaluate:

- Student success in courses included in block schedules compared to the same courses in a traditional schedule
- Student achievement of university wide learning objectives (e.g., informational literacy, critical thinking) in block scheduled courses compared to traditional courses.

Contacts perceive block schedule as more effective for students learning, retention, and completion than traditional schedules. Student success metrics consistently demonstrate the positive impacts of block scheduling on student success and bolsters administrator confidence in block scheduling. Most administrators evaluate student success in distance education programs with the following metrics:

- Four-year graduation rate
- Time to degree completion
- Semester-to-semester retention rate
- Student debt burden
- Number of enrolled extraneous courses

### Common Scheduling Challenges

#### ***Restrict Scheduling Accommodations to Minimize Inter-Departmental Scheduling Conflicts***

Scheduling administrators experience difficulty when departmental leaders neglect to input course information on time. Excessive faculty accommodations (e.g., reserving instructional space before the class time) also inhibit the scheduling process as they limit the number of potential spaces available to schedule courses. Additionally, staff turnover at the departmental chair and dean levels results in a lack of familiarity with scheduling processes within academic departments.

#### **Common Scheduling Challenges and Solutions**

<b>Challenges</b>	<b>Solutions</b>
<ul style="list-style-type: none"><li>× Departmental scheduling administrators input course information late</li><li>× Faculty accommodations cause excessive course conflicts that require time-consuming reconciliation</li><li>× Staff turnover results in lack of familiarity with scheduling processes</li></ul>	<ul style="list-style-type: none"><li>✓ Enforce strict deadlines for input of course information</li><li>✓ Penalize tardy course submission with lowered priority on instructional space</li><li>✓ Allow faculty accommodations only for medical and religious reasons, not faculty preference</li><li>✓ Host basic course input training sessions prior to the start of a scheduling cycle</li></ul>

## 5) Research Methodology

---

### Project Challenge

Leadership at a member institution approached the Forum with the following questions:

- How do contacts manage the implementation of block scheduling in addition to maintaining a traditional scheduling model?
- Who oversees the implementation of block scheduling?
- What process do contacts use to create block scheduling?
- How do contacts work across departments to create efficient schedules?
- What IT resources do contacts require to manage block scheduling?
- How do administrators schedule courses that require extended class time or laboratories?
- How do contacts include developmental courses into block schedules?
- What benefits does block scheduling offer?
- What are the disadvantages of block scheduling?
- What metrics do contacts use to measure the effectiveness of block scheduling?
- How do contacts measure the impact of block scheduling on student learning?
- How has a transition to block scheduling impacted student retention and completion rates?

### Project Sources

The Forum consulted the following sources for this report:

- EAB's internal and online research libraries (eab.com)
- The Chronicle of Higher Education (<http://chronicle.com>)
- National Center for Education Statistics (NCES) (<http://nces.ed.gov/>)

The Forum interviewed student affairs administrators.

## A Guide to Institutions Profiled in this Brief

<b>Institution</b>	<b>Location</b>	<b>Approximate Institutional Enrollment (Undergraduate/Total)</b>	<b>Classification</b>
<b>Institution A</b>	Pacific West	1,200/ 2,300	Master's Colleges and Universities (larger programs)
<b>Institution B</b>	Midwest	11,100/ 15,600	Master's Colleges and Universities (larger programs)
<b>Institution C</b>	Northeast	19,000	Associate's--Public Urban-serving Multicampus
<b>Institution D</b>	Mountain West	24,000	Associate's--Public Urban-serving Multicampus
<b>Institution E</b>	Mountain West	30,000	Associate's--Public Urban-serving Multicampus
