# Coronavirus Outbreak's Impacts on Employer Demand

### A Job Postings Analysis and Discussion Guide

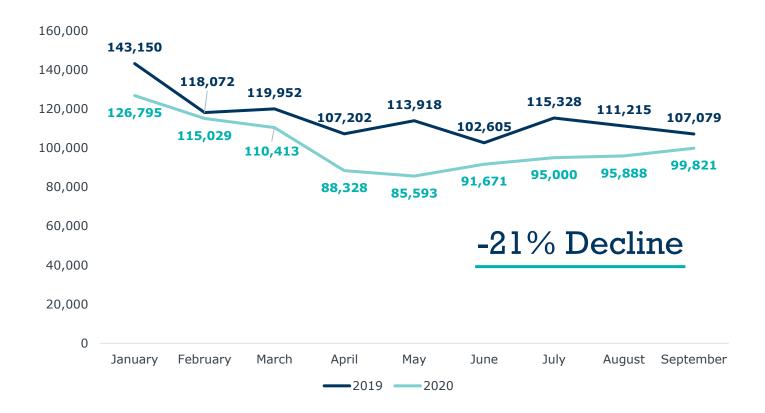

Created October 2020

#### Market-Responsive Program Development amid Ongoing Volatility

As the novel coronavirus entered and spread across the globe in early 2020, stay-at-home orders immobilized economic activity. Hiring freezes, furloughs, and layoffs defined the summer months. EAB has continued to monitor regional labor market data to inform your program planning conversations. Use these analyses and the included discussion questions to consider how to adapt your portfolio for COVID-19 and the pandemic economic recovery.

#### **Changes in Job Postings Volume**

Canada Nationwide Data, January-September 2019 and January-September 2020

- How did our economy react to the coronavirus outbreak across April through September? Has our regional
  public health and economic response been consistent, or have we experienced improvements and declines
  throughout?
- How do our recent job posting trends contrast to this time last year? To what extent do we see this reflected in our students' behaviors?

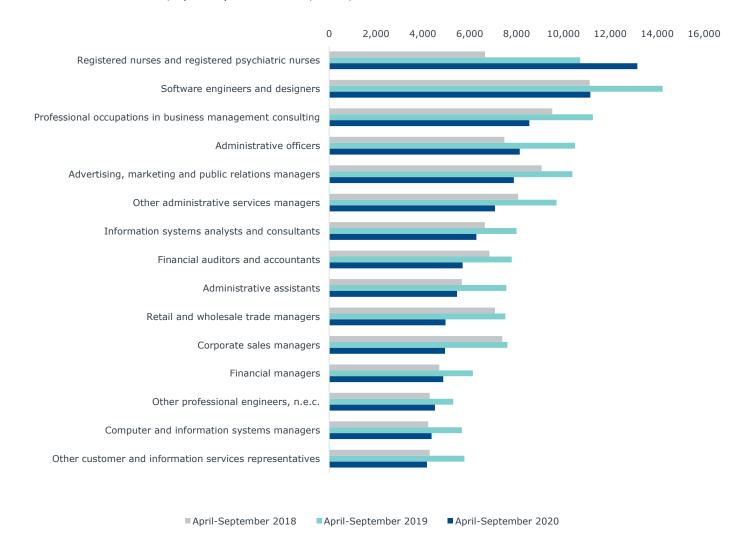

## Changes in Top Occupations Advertised Regionally in 2018, 2019, and 2020

#### **Questions for Initial Discussion**

- Which roles, if any, experienced increased demand in 2020 relative to 2019 and 2018? To what extent would
  past trends encourage us to anticipate a sustained increase? Or, do we anticipate the increase was driven by
  the outbreak and may decline once short-term needs are met?
  - Do we offer programs to prepare students for in-demand roles?
- Which roles experienced decreased demand in 2020 relative to 2019 and 2018? Would industry projections as we recover from the coronavirus outbreak suggest future growth or continued decline for these roles?
  - Should we temper expectations for relevant program enrollment?
  - Is it likely these roles also suffered layoffs across recent months? Do we likely have alumni or community members who need re-training for reemployment?
