New Feature

Course Equivalencies

We are excited to introduce the Course Equivalency feature, designed for prospective transfer students. This optional feature allows both students and staff to view equivalent courses by college submission. Students will find an Equivalent Courses tab displaying matching courses when viewing the details of their programs of interest. Staff can access detailed equivalency information when viewing individual student profiles through the Prospective Student Table.

Student View

Anthropology, BS

The Anthropology Program in the Comparative Cultural Studies Department focuses on archaeology and ethnology as specialized areas of study. A diverse curriculum provides courses in the major subfields of ethnology, archaeology, linguistics, and physical anthropology as well as in the study of important world regions, such as the United States, North America, Latin America, and Africa.
