

How Institutions Are Achieving Data Wins with Edify

Edify Serves as Your Trusted Data Foundation

Edify helps institutions move from fragmented data to focused action. Built on a unified higher education data model, Edify brings together operational reporting, compliance confidence, career outcomes, and student progress analytics into a single, trusted foundation. Learn how partners have used Edify to answer critical questions, prioritize investments, and drive results. There are multiple starting points—partners typically start in one area and expand into adjacent use cases as new questions emerge. The result is faster insight, clearer accountability, and data that leaders can use with confidence to guide decisions that matter most.

Run the Institution

Do we know what's happening right now and where to act?

Common entry point for cabinet leaders and institutional research teams

- Monitor revenue, expense, and margin trends
- Understand enrollment funnel health and yield performance
- Track workforce composition, hiring patterns, and vendor spend
- Analyze space utilization and facilities efficiency

EXAMPLE PROJECTS

- Command Center Operational Reporting
- Emergency Operations Report
Des Moines Area Community College
- Executive KPI Dashboard
University of Illinois–Chicago
- Institutional Advancement Reports
Haverford College

Protect the Institution

Are we confident in our data, reporting, and compliance?

Often the first use case where speed, trust, and accuracy matter most

- Prepare IPEDS and state enrollment and outcomes submissions
- Validate financial aid compliance and reported vs. operational data
- Support accreditation review and audit readiness
- Maintain metric definitions, documentation, and year-over-year trends

EXAMPLE PROJECTS

- IPEDS Enrollment and Completion Reporting
- ACHE State Reporting
University of West Alabama
- Pennsylvania Department of Education (PDE) Reporting
Northampton Community College
- Wisconsin State Reporting
Gateway Technical College

Get Students Across the Finish Line

Where are students losing momentum and why?

High-impact entry point for student success, advising, and academic affairs

- Track credit accumulation, academic momentum, and time-to-degree
- Identify DFW and gateway course risk by program
- Analyze stop-out, reenrollment, and transfer patterns
- Understand excess credits and policy-driven inefficiencies

EXAMPLE PROJECTS

- Degree Audit Workspace
Utah Tech University
- Handshake Data Integration
University of Montana
- LMS Predictive Modeling
John Carroll University
- Student Migration Dashboard
South Dakota Board of Regents

Prove Return on Education

Are outcomes aligned with student and institutional investment?

Typically expands from student success and executive reporting use cases

- Measure graduate employment and earnings outcomes by program
- Track time-to-employment and longitudinal career progression
- Analyze internship, experiential learning, and graduate school outcomes
- Support accreditation, state reporting, and ROI storytelling

EXAMPLE PROJECTS

- Lightcast Data Integration
Formerly EMSI
- Stepping Blocks Data Integration
University of Montana
- Gainful Employment Data
- National Student Clearinghouse Data Ingestion
